### DETAILED ACTION

1. Claims 1-43 have been examined.

#### *Election/Restrictions*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, 39, 41, drawn to selecting participants, classified in 705/14.
  - II. Claims 21-38, drawn to performing an act, verifying an act, reward levels for acts, classified in class 705/14.
  - III. Claims 40, 42, 43, drawn to processing funded and unfunded points, classified in 705/14.

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, Subcombination I has separate utility such as selecting participants.

Subcombination II has separate utility such as a user performing an act, verifying an act, and determining reward levels for acts. Subcombination III is drawn to processing funded and unfunded points. See MPEP § 806.05(d). Each of these subcombinations can function as a separate, distinct invention that does not need the other subcombinations. At the same time, the subcombinations could be combined into a single combination.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

A telephone call was made to Kurt Maschoff at (203)972-0081 on approximately 8/28/2007 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
